No storage accounts to display

Create a storage account to store up to 500TB of data in the cloud. Use a general-purpose storage account to store object data, use a NoSQL data store, define and use queues for message processing, and set up file shares in the cloud. Use the Blob storage account and the hot or cool access tiers to optimize your costs based on how frequently your object data is accessed.

Create a storage account

Azure Storage is a Microsoft-managed service providing cloud storage that is highly available, secure, durable, scalable, and redundant. Azure Storage includes Azure Blobs (objects), Azure Data Lake Storage Gen2, Azure Files, Azure Queues, and Azure Tables. The cost of your storage account depends on the usage and the options you choose below.
[Learn more about Azure storage accounts](#)

Project details

Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

(New) AzureAssignment-EventGrid
[Create new](#)

Instance details

Storage account name * ⓘ
amanazureeventgrid

Region * ⓘ
(Asia Pacific) East Asia
[Deploy to an Azure Extended Zone](#)

Preferred storage type
Choose preferred storage type

ⓘ This helps us provide relevant guidance. It doesn't restrict your storage to this resource type. [Learn more](#)

Performance * ⓘ

☒ Standard: Recommended for most scenarios (general-purpose v2 account)

☐ Premium: Recommended for scenarios that require low latency.

Redundancy * ⓘ
Geo-redundant storage (GRS)

☒ Make read access to data available in the event of regional unavailability.

☐ Geo priority replication guarantees Blob storage data is geo-replicated within 15 minutes.

Create Logic App

Select a hosting option

These hosting plans determine the resource allocation, scaling and pricing for your app. [Learn more about Logic App hosting options](#)

Hosting plans	Consumption	Standard		
	Multi-tenant Fully managed and easy to get started.	Workflow Service Plan Single tenant runtime with in-app connectors and scaling features.	App Service Environment V3 Single tenant runtime with full isolation and scale out feature across App Service plans.	Hybrid Local processing and multi-cloud support with Kubernetes Event-Driven Autoscaling.
Compute	Shared	Dedicated	Dedicated	Customer managed
Networking	Public cloud	VNET Integration	VNET Integration	Local network access
Pricing	Pay-per-operation	Per workflow service plan instance	Per App Service for App Service Environment instance	Per vCPU hour of Kubernetes cluster

Home > Logic apps

Create Logic App (Multi-tenant)

Basics Tags Review + create

Create a logic app, which lets you group workflows as a logical unit for easier management, deployment and sharing of resources. Workflows let you connect your business-critical apps and services with Azure Logic Apps, automating your workflows without writing a single line of code.

Project Details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.
